it got worse children stopped growing some people were hospitalized with mysterious illnesses others died citizens of flint protested that the water was dangerous despite what seemed so apparent from the murky foul smelling liquid pouring from the city s faucets officials refused to listen they treated the people of flint as the problem not the water which was actually poisoning thousands through interviews with residents and intensive research into legal records and news accounts journalist candy j cooper assisted by writer editor marc aronson reveals the true story of flint poisoned water state in 1948 to the intense conflicts over israel the palestinians and the jewish settlements of today along the way aronson intersperses stories from his own family s long experiences in israel while asking and answering such questions as can a religious state also be a democratic one is israel the victim or the aggressor do modern states have moral obligations and perhaps the most troubling question of all what kind of israel should exist once again aronson has created

history for young adults that is exciting probing clear and most of all fearless reading a book will not change your life but using the dash principles will invoke a sense of purpose that will add value to your life the kind of life that money cant buy dash is based on the principles of dedication attitude success and happiness and shows the reader how to apply these attributes to their daily lives the election of donald trump has exposed american society s profound crisis of hope by 2016 a generation of shrinking employment rising inequality the attack on public education and the shredding of the social safety net had set the stage for stunning insurgencies at opposite ends of the political spectrum against this dire background ronald aronson offers an answer he argues for a unique conception of social hope one with the power for understanding and acting upon the present situation hope he argues is far more than a mood or feeling it is the very basis of social will and political action it is this kind of hope that aronson sees brewing in the supporters of bernie sanders who advocated the tough minded and inspired disposition to act collectively to make the world more equal more democratic more peaceful and more just and it was directly contrasted by trump s supporters who showed a cynical and nostalgic faith in an authoritarian strongman replete with bigotry and misogyny beneath today s crisis aronson examines our heartbreaking story a century of catastrophic violence and the bewildering ambiguity of progress all of which have contributed to the evaporation of social hope as he shows we are now in a time when hope is increasingly privatized when despite all the ways we are connected to each other we are desperately alone struggling to weather the maelstrom around us demoralized by the cynicism that permeates our culture and politics and burdened with finding personal solutions to social problems yet aronson argues even at a time when false hopes are rife social hope still persists carefully exploring what we mean when we say we hope and teasing hope apart from its dangerously misconstrued sibling progress he locates seeds of real change he argues that always underlying our experience even if we completely ignore it is the fact of our social belonging and that this can be reactivated into a powerful collective force an active we he looks to various political movements from the massive collective force of environmentalists to the movements around sanders and jeremy corbyn as powerful examples of socially energized politically determined and actionably engaged forms of hope even in this age of donald trump the result is an illuminating and inspiring call that anyone can clearly hear we can still create a better future for everyone but only if we resist false hopes and act together in this book authors discuss research and theory on the social psychological forces that shape academic achievement a key focus is to show how psychological principles can be used to foster achievement and make schooling a more enjoyable process topics are highly relevant to both social and educational psychology with discussions of core concepts such as intelligence motivation self esteem and self concept expectations and attributions prejudice and interpersonal and intergroup relations katelyn aronson and 1 new york times as atul gawande s being mortal physician and award winning author louise aronson s elderhood is an essential empathetic look at a vital but often disparaged stage of life for more than 5 000 years old has been defined as beginning between the ages of 60 and 70 that means most people alive today will spend more years in elderhood than in childhood and many will be elders for 40 years or more yet at the very moment that humans are living longer than ever before we ve made old age into a disease a condition to be dreaded denigrated neglected and denied reminiscent of oliver sacks noted harvard trained geriatrician louise aronson uses stories from her quarter century of caring for patients and draws from history science literature popular culture and her own life to weave a vision of old age
