Bob Blitzer has inspired thousands of students with his engaging approach to mathematics, making this beloved series the #1 in the market. Blitzer draws on his unique background in mathematics and behavioral science to present the full scope of mathematics with vivid applications in real-life situations. Students stay engaged because Blitzer often uses pop culture and up-to-date references to connect math to students' lives, showing that their world is profoundly mathematical.

This package consists of the textbook plus an access kit for MyMathLab. MyStatLab: Precalculus Concepts Through Functions: A Unit Circle Approach to Trigonometry, Second Edition, embodies Sullivan's hallmarks: accuracy, precision, depth, strong student support, and abundant exercises. While exposing readers to functions in the first chapter to ensure that students master basic skills and develop the conceptual understanding they need for the course, this text focuses on the fundamentals, preparing for class, practicing their homework, and reviewing the concepts. After using this book, students will have a solid understanding of algebra and functions so that they are prepared for subsequent courses such as finite mathematics, business mathematics, and engineering calculus.

MyMathLab provides a wide range of homework, tutorial, and assessment tools that make it easy to manage your course online. For courses in college algebra, algebra, trigonometry, precalculus, and trigonometry, which requires student use of a graphing calculator, using the graphing utility to enhance mathematics does not replace it. This text approaches technology as a tool to solve problems, motivate concepts, and explore ideas. Many problems are solved using both algebra and a graphing utility, with the benefits of each illustrated throughout applications and examples using real data. Enable students to make connections between the mathematics learned and familiar situations. The authors' user-friendly approach helps students develop the skills needed to succeed in subsequent mathematics courses.
